

**CROWDGUARD**  
PLAN PROVIDE PROTECT

# H.V.M.

## (HOSTILE VEHICLE MITIGATION) AND EVENT SECURITY

Crowdguard was established in response to the increased threat posed by vehicle attacks within the UK and Europe. Hundreds have been maimed or killed through acts of terrorism across our continent and are headline news, with attacks targeting open spaces and events where crowds gather and where vehicles can be used as weapons against the public. The UK Govt openly recognises such crowded places as 'soft targets' and practical measures are needed to ensure public safety.

*In the UK, Crowdguard are leading the market with solutions to Hostile Vehicle Mitigation (H.V.M.), with effective products delivered from innovative design, quality build and rigorous testing. The success of the solutions encompasses the product and its deployment, where the quality of installation is essential in the integrity of HVM. Deployment needs to be efficient, precise, and without disruption.*

- ✔ 24/7 Response.
- ✔ Efficient and professional service.
- ✔ Local distribution network with branches throughout the UK.
- ✔ A dedicated bespoke event protection team specialising in Manufacturing, Security, Barriers, Counter Terrorism, British Policing, Event and Crisis Management.
- ✔ We only deploy our barriers with highly skilled installation technicians through our sister company Ainscough Industrial Services who have 40 years' experience in equipment moving and handling
- ✔ Closure of roads can be costly and inconvenient. Crowdguard can secure an average road width in 30 minutes. Keeping access points operational for longer
- ✔ All our kit is checked and maintained after every single deployment.
- ✔ Our product is always 100% reliable, safe and effective.
- ✔ **Bespoke Branding** – we can personalise the barriers for your event with your own branding or sponsorship decals.
