

## FENCESAFE TEMPORARY FENCING FROM CLD

The FenceSafe range of surface mounted temporary fencing from CLD Physical Security Systems, the UK's largest manufacturer and supplier of rigid mesh fencing and security gates, provides a temporary perimeter protection solution with permanent fence performance.

Crowdguard offers three options for FenceSafe temporary fencing, suitable for a wide variety of events and sites, with specification aligned to the security rating and perimeter protection required. We will help you select the most appropriate solution from:

- Dulox Lite – a double wire mesh panel temporary fence
- Eclipse – a profiled mesh fence
- SR1 – a D-rated security fence

Made from 90% recycled steel, all three variations of FenceSafe temporary fencing can be installed with ingress/egress solutions for pedestrians and/or vehicles, including sliding gates, swing gates, boom arm barriers, or turnstiles.

The FenceSafe temporary fencing system is installed using a patented, BE EN 1991 compliant MDPE base, manufactured from 100% recycled materials. Each base is ballasted using 200kg of bagged or loose ballast and the fence panels are attached using a 4-way adjustable bracket. The bases have forklift entry points for ease of movement on site and are designed for easy stacking for storage when not in use.

### Technical Specification

#### PANEL HEIGHT

**1230mm – 3030mm depending on chosen system**

#### PANEL WIDTH

**2500mm – 3000mm depending on chosen system**

#### BUILD QUALITY CERTIFICATION

**BS 1722 Part 14 for welded mesh fencing**  
**LPCB 9001:2015**

#### MATERIALS CERTIFICATION

**BE EN ISO 1461 for galvanising**  
**BS EN 13438 for powder coating**

#### WINDLOADING CERTIFICATION

**BS EN 1991-1-4 and BS 6399**  
**Temporary Works Forum**  
**Best Practice TWf2012:01 compliant**
