

IMPAKT DEFENDER FROM ROSEHILL SECURITY

An IWA 14 rated vehicle security barrier (VSB) manufactured from 100% recycled rubber and polyurethane, the Impakt Defender provides both a physical and visual security deterrent, delivering excellent protection from vehicle as a weapon attacks and vehicle incursions.

Requiring no foundations, the surface mounted system can be rapidly deployed as a temporary or permanent security measure. More than 65% lighter than concrete solutions, Impakt Defender has a unique shape, and is specifically designed to block vehicles by deforming to increase stopping performance. A modular VSB system installed as 430kg rubber units, the system is connected by steel securing cables, providing the flexibility to protect both entrance areas and site perimeters against vehicle attacks or incursions. The steel securing cables can also be anchored to create an even stronger physical barrier.

Easy to install, remove and relocate, Impakt Defender's tough construction enables it to be installed almost anywhere.
